

Please do implement any proposal that would lessen Indiana's Telephone Privacy law protections. Why should you allow businesses to call an individual that has registered their desire not to receive such calls. I would not be happy with these businesses and not be receptive to their message. It would only waste my time and theirs. Before Indiana enact this legislation, I would receive 15-20 calls per week. That number has now decreased dramatically. Please do not give these phone "spammers" a legal excuse to invaid our privacy once again. Thank you.
